

Please request that Sinclair not show the anti Kerry 'documentary.' They are using public air waves to promote a corporate bias.

It is an example of what can happen when too much power is accorded to such entities without restriction.

If such a film is shown, without showing one of contrasting view prior to the election, the public is not being served.

It is a major source of concern.

I am aware of the amount of money that is spent by these giants to influence FCC decisions. Persons who "serve the public" should be held to a higher standard
